

EUTRAC RECESSED TRACK

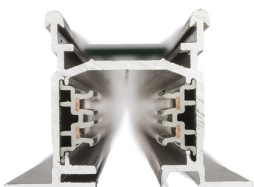

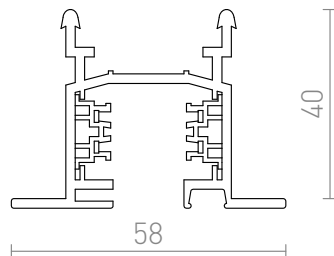

EUTRAC 3-circuit recessed track system made of extruded aluminium profile, which also serves as earthing. Inside, two embedded plastic profiles through which four copper conductors with a diameter of 2.5 mm are routed. Any profile can be easily cut to the desired length. The ends of the wires do not need to be cut or bent. When using halogen sources, the minimum installation height is 2.5 m. Below this height we recommend replacements in LED sources.
