NEW

# MARENGA RD6 96

**LED  6W   570 lm Ra 80**

A recessed LED lamp for a plasterboard ceiling with a low recessed depth and a decorative shade. The shade is created by 3D printing. Made of eco-friendly PLA material, which is fully degradable. The size of the mounting hole can be adjusted using the sliding fixing springs. The lamp can conveniently replace existing halogen lamps without the need to modify the mounting holes.
